■ Career Objective

Passionate and detail-oriented frontend developer with skills in React.js, React Native, HTML, CSS, JavaScript, and Python. Seeking opportunities to apply my technical knowledge and creativity in building user-friendly web and mobile applications, with a focus on modern design and seamless functionality.

■ Technical Skills

Frontend	React.js, HTML5, CSS3, JavaScript (ES6+)
Mobile Development	React Native
Programming Languages	Python (basics)
Tools & Platforms	Git, GitHub, Vite, Expo
UI/UX	Figma (basics)
Other	Responsive Design, API Integration

■ Education

B.Tech – Artificial Intelligence & Data Science
[Your College Name], India | 2022 – 2026 (Pursuing)

■ Projects

AI Health App (React Native)
Developed a mobile app to monitor health data from EMG/EMS sensors. Integrated Bluetooth functionality for real-time data.

Portfolio Website (React.js)
Designed and developed a responsive personal portfolio using React.js and modern UI principles.

Student Performance Dashboard
Created a web-based dashboard to visualize academic performance data using charts and responsive layouts.

■ Achievements & Certifications

- Completed courses in Web Development & Python basics (Coursera/Udemy/FreeCodeCamp).
- Built multiple personal and academic projects showcasing web & mobile development skills.

■ Soft Skills

Problem-solving | Communication | Team collaboration | Time management
